

The Evolution of EU Cyber Legislation: How NIS 2 Is Shaping the Future

AUGUST 28

3:00 - 4:00 PM CEST

Peter Geelen

CEO Cyberminute – PECB ISO Master

Johan Decock

Cybersecurity & Certification Expert

#GlobalLeadingVoices

Agenda

- Introduction
- EU NIS 2 & impact to companies
- NIS 2 State of play in EU
- Implementing & interpreting NIS2
- Implementation approaches
- Demonstrating compliance
- Cyberfundamentals (CyFun)
- Q&A
- (+References)

Your presenters today

Peter GEELEN
CEO Cyberminute –
PECB certified ISO Master / NIS2 LI

<https://www.linkedin.com/in/pgeelen/>

Johan DECOCK
CCB Belgium
Inspector – Certification Expert

<https://www.linkedin.com/in/johan-decock-8a21025/>

Introduction

NIS2?

EU Cyber legislation (EU) with global impact

- Directive (not regulation)
- Cybersecurity
- Critical sectors
- Update NIS1

- More info:
 - <https://ffwd2/NIS2> (Long URL: <https://eur-lex.europa.eu/eli/dir/2022/2555/oj>)

NIS2 and other legislation

EU Cyber legislation (EU) with direct impact to other initiatives

- CER
- GDPR
- DORA
- AI (AI Act)
- ...

<https://digital-strategy.ec.europa.eu/en/policies/nis2-directive>

NIS2

Impact

NIS2 impact to companies

Direct <> indirect

Direct

- NIS2 Size definitions
 - Size-cap (<50, >=50, >250)
 - Annual Turn-over
 - Balance total

Indirect

- Supply chain
- Contractual
- Incidents
- Best practices

NIS 2 scope

Sectors in scope

NIS2

Compliance

Demonstrating compliance with NIS 2

What choices do you have?

Standards and frameworks

- ISO 27001 + ISO 27032, ISO 27017, ISO27018, ...
- NIST CSF
- IEC 62443

Certification?

- ISO 27001
- Cyberfundamentals (Cyfun, created by Belgian Cyber authority)

Cyberfundamentals

● What is CyberFundamentals (CyFun®)?

Making Belgium
one of Europe's
least cyber-
vulnerable
countries

A set of **actionable** measures to:

- **protect** data
- significantly **reduce the risk** of the most common cyber-attacks
- **increase** an organisation's **cyber resilience**

Active
Cyber
Security

CyFun[®] in the EU

Scheme owner group

Observing member

Legislation CyFun based

Vincent Strubel ANSSI (au fr Senate – 12/2024):
'Soit vous appliquez la recette de cuisine française, soit vous appliquez la labélisation belge. En-tout-cas si cela atteint l'objective, il n'y a pas de travaux supplémentaires'

Mutual recognition procedure
Acceptance to allow voluntary
Application across EU has started

● Who is CyFun[®] for ?

Private and public entities:

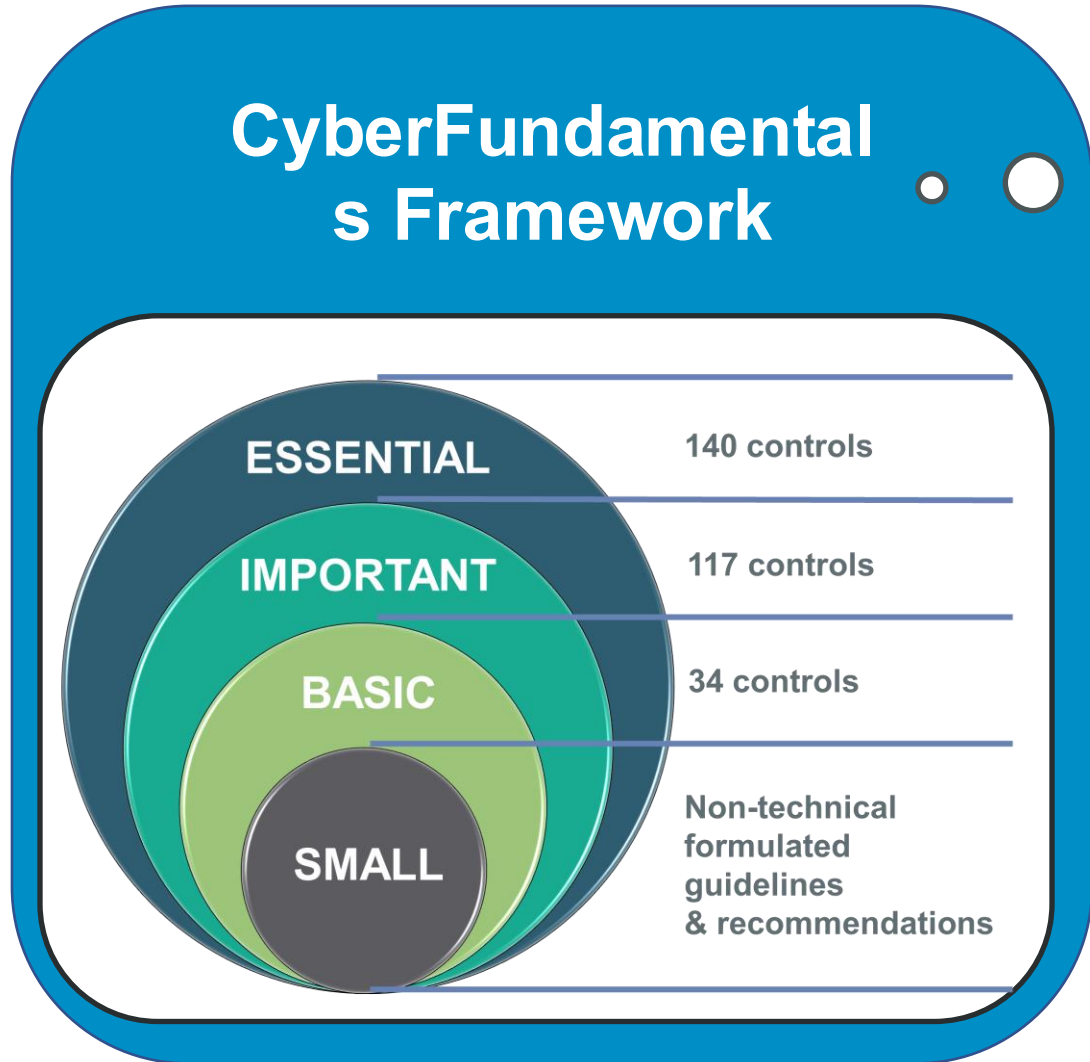

- NIS2 presumption of compliance in Belgium
- Supply Chain cybersecurity assurance
- Use to demonstrate the entities resilience to banks, assurance companies
- Voluntary use

Use Certification under accreditation: Cost effectiveness

Accredited once,
Accepted everywhere.

The CyberFundamentals Framework

ESSENTIAL:	100 % Attack countered	✓
IMPORTANT:	94 % Attacks countered	✓
BASIC:	82 % Attacks countered	✓

CERT attack profiles (retrofit of successful attacks)

CENTRE FOR CYBERSECURITY BELGIUM

CERT.be
The Federal Cyber Emergency Team

● NIST CSF as a starting point – Why?

- **Common** and **accessible** language
- **Adaptable** to many technologies, lifecycle phases, sectors and uses
- **Risk-based**
- Based on **international** standards
- **Living** document
- Guided by **many angels** – private sector, academia, public sector

CyFun[®] core functions

IDENTIFY

What processes and assets are at risk?

PROTECT

Take steps to safeguard the organization's assets

DETECT

Routinely monitor to alert for problems

RESPOND

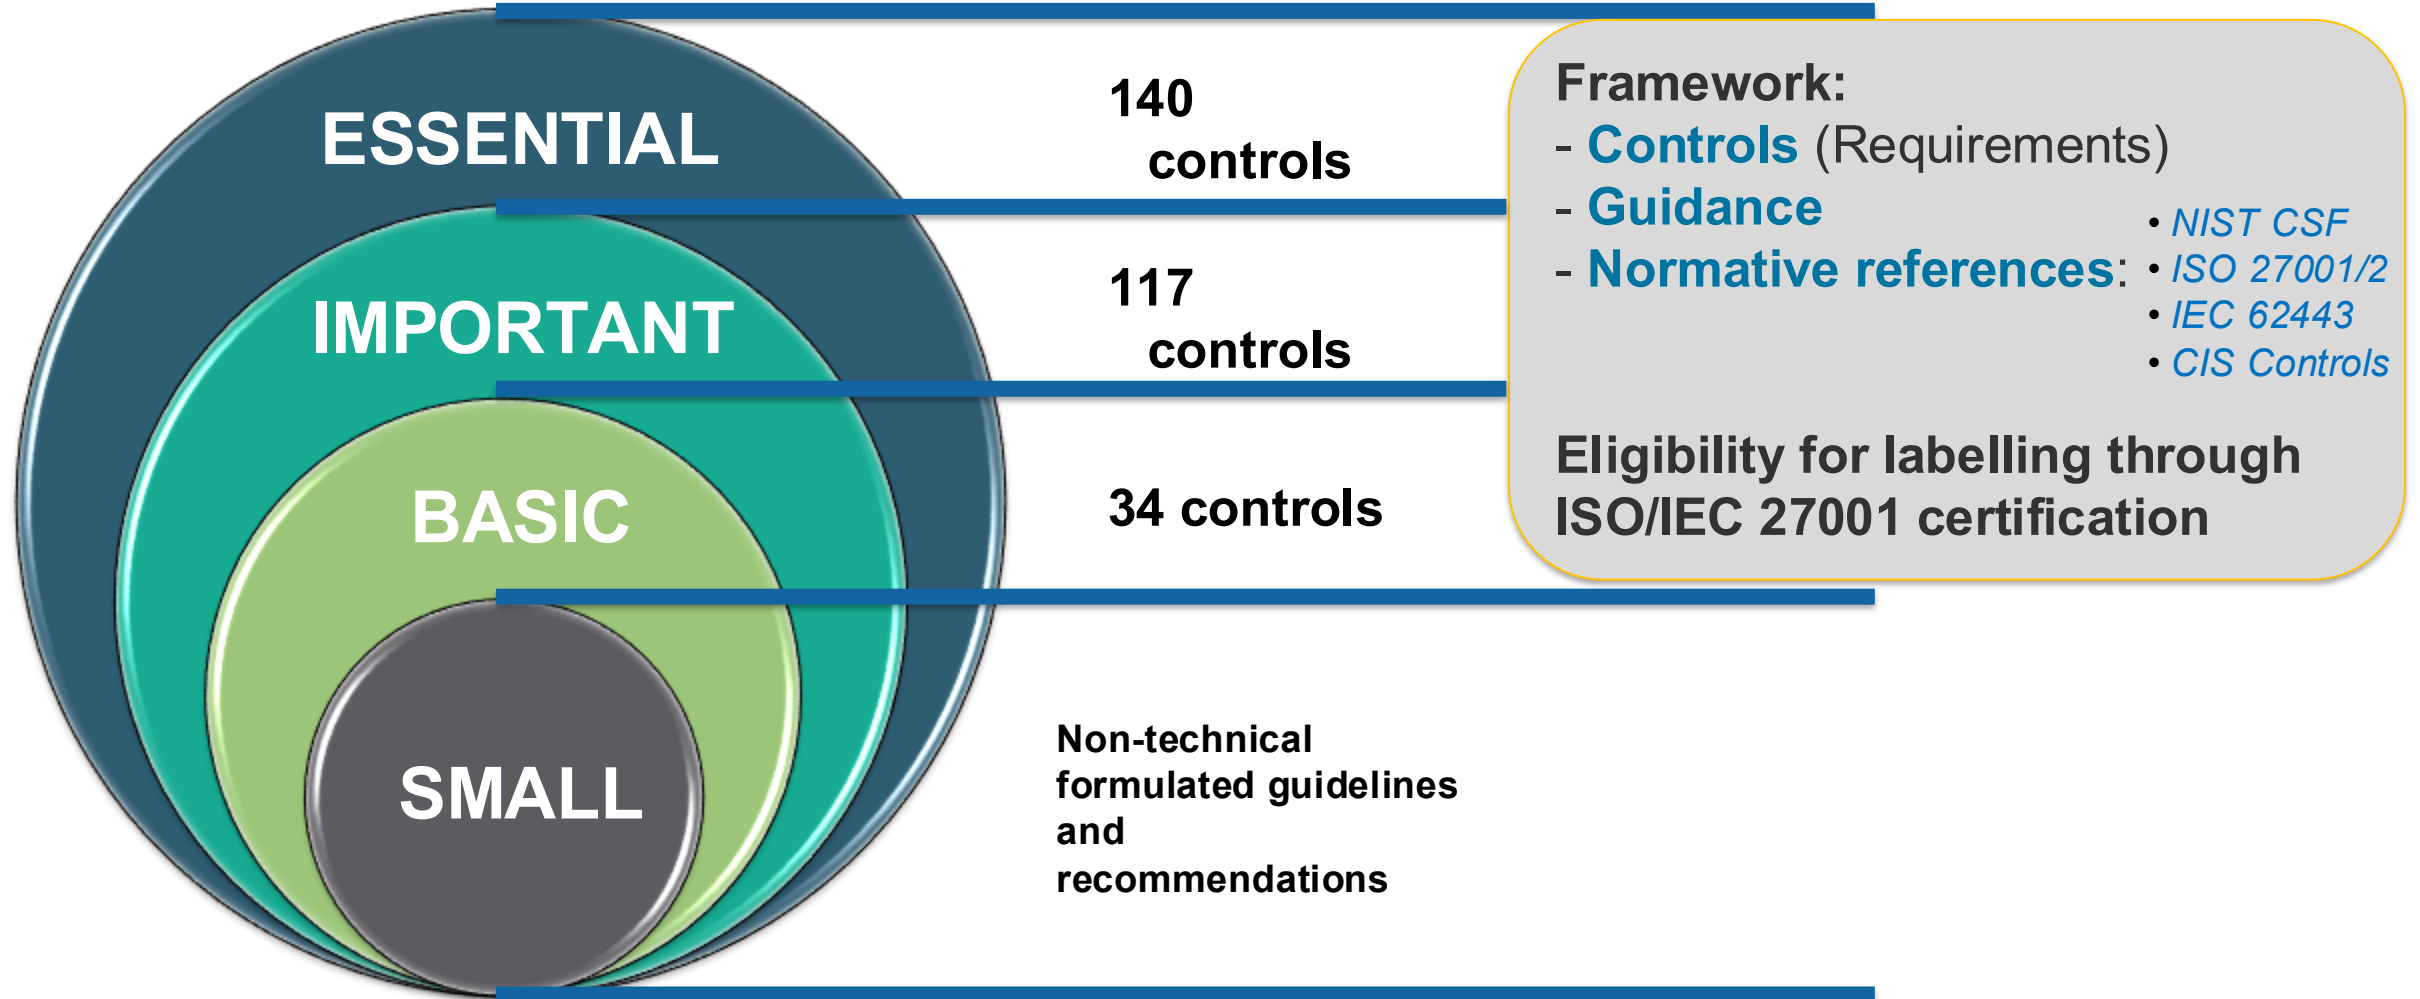

Plan for the worst, be ready to act

RECOVER

Get back to normal after an incident

● The CyFun[®] levels

● Proportionality - the Principle of balance

Through the assurance levels based on cyber risk

Focus on real life threat patterns

Through assurance level evaluation

BASIC

- Standard security measures for all enterprises.
- Technology and processes generally available.
- Known cyber security risks.

IMPORTANT

- Targeted cyber-attacks.
- By actors with common skills and resources.

ESSENTIAL

- Targeted **advanced** cyber-attacks.
- By actors with extensive skills and resources.

Key Measures

Conformity thresholds considering the maturity level.

● The CyFun[®] Key Measures

➔ No misuse of risk assessments to do nothing ➔ just do it

BASIC	Measure
1	Identify who should have access to critical information and technology
2	Limit employee access to to what they need to do their jobs
3	Nobody shall have administrator privileges for daily tasks
4	Secure remote access e.g. using MFA
5	Install and activate firewalls .
6	Incorporate network segmentation and segregation .
7	Install Patches and security updates .
8	Maintain and review (activity) Logs .
9	Install and update Anti-virus, -spyware, and other -malware programs
10	Make Backups and store them separately.

● CyFun[®] is measurable

CyberFundamentals Toolbox is **publicly available** (EN) → www.cyfun.eu

CyFun[®] advantages

- One system to maintain for all sectors and entities
- Low-cost Risk Assessment and Security Plan
- Supply chain cyber security level can be easily and uniformly assessed (Ripple-through)
- Effective and efficient supervision (low Gov cost)
- There is a recognized method for managing board member responsibilities
- Reference framework for Insurance companies (better coverage vs. price)
- Cross-sector education, training and exercises
- International recognition → cross-border (partially but growing)

CyberFundamentals Characteristics Summary

Focus on both Awareness & training, (Technical) Security Measures and Governance

Address measures for People, Processes and Technology

Multi-standards framework, international references

Requirements linked to standards in use by business community (NIST; CIS; ISO27XXX, IEC 62433)

Guidance

Proportional requirements

Embedded within a framework for all (Belgian) entities, including BE NIS entities

Enabling to define each one's growth path

Proportional assurance

Self-assessment, internal/external audit and/or certification

The CyberFundamentals Framework 2025 CyFun[®] 2025 (Q4 2025)

An initiative of the Centre for Cybersecurity Belgium

Belgian Cybersecurity Certification Authority

— What is new in CyFun® 2025

- **Aligned** with NIST Cybersecurity Framework (CSF) 2.0 and relevant European legislation (e.g. NIS2).
- Incorporates **recent developments** in information and cybersecurity.
- Integrates **user feedback** from CyFun® 2023.
- Expands focus on **supply chain security and operational technology (OT)**.
- Reformulates controls and guidelines to **enhance clarity and auditability**.
- Adds a specific goal to each control to **improve understanding**.
- Provides more **comprehensive guidance** on interpreting requirements.
- Introduces “**Governance Measures**” to support auditability of the “Essential” Assurance Level.
- Offers a **streamlined spreadsheet version** containing only the core requirements for easier management.
- Corrects grammatical, spelling, and editorial issues.

Training

Get trained

- NIS2 Lead implementer
- ISO 27001 Lead Implementer / Lead auditor
- NIST Cybersecurity
- ISO 27400

Level Up Your Career with **PECB Skills**

Unlock unlimited learning with 3,000+ short 15-minute courses in Cybersecurity, Information Security, Artificial Intelligence, Business Continuity, Auditing & Compliance, Digital Transformation & more.

Why Choose PECB Skills?

- Global training, local flexibility
- Short, practical courses for busy professionals
- Learn from top industry experts
- Original PECB product
- Earn CPD credits and get a certificate of completion

Get full access for only \$236 (Regular price: \$295)

Get 20% off Today!

Exclusive Discount for PECB Anniversary
Offer valid until August 30
